

Dear Friends: In doing our due diligence, we have many documents. We found these test results done by a third party on July 9, 2020. For those with scientific background, they may make more sense. Be sure to read the notes at the bottom.

Sample Location: Indian - Mid					
Sample Date: 7-9-20					
Amount Examined: 100 mL (listed below in cells mL-1)					
Bacillariophyta (Diatoms)		Chlorophyta (Green Algae)		Cyanophyta (Blue-green Algae)	
<i>Aulecoseira</i>	256	<i>Ankistrodesmus</i>		<i>Anabaena</i>	9492
<i>Asterionella</i>		<i>Chlamydomonas</i>		<i>Anacystis</i>	
<i>Catacombus</i>		<i>Chlorella</i>	44	<i>Aphanizomenon</i>	1144
<i>Cavinula</i>		<i>Chlorococcum</i>		<i>Chroococcus</i>	
<i>Cocconeis</i>		<i>Closterlopsis</i>		<i>Coelosphaerium</i>	
<i>Cyclotella</i>	44	<i>Coelastrum</i>		<i>Lyngbya</i>	
<i>Diatoma</i>		<i>Cosmarium</i>	44	<i>Microcystis</i>	44
<i>Denticula</i>		<i>Eudorina</i>		<i>Oscillatoria</i>	
<i>Epithemia</i>		<i>Microthamnion</i>		<i>Planktothrix</i>	
<i>Fragilaria</i>	84	<i>Oedogonium</i>		<i>Pseudoanabaena</i>	
<i>Frustulia</i>		<i>Oocystis</i>			
<i>Gyrosigma</i>		<i>Pleodorina</i>	84	Cryptophyta	
<i>Melosira</i>	8096	<i>Pediastrum</i>	44	<i>Cryptomonas</i>	168
<i>Navicula</i>		<i>Phytoconis</i>			
<i>Nitzschia</i>		<i>Rhizoclonium</i>			
<i>Rhopalodia</i>		<i>Scenedesmus</i>		Euglenophyta (Euglenoids)	
<i>Stephanodiscus</i>	44	<i>Schroederia</i>		<i>Euglena</i>	
<i>Synedra</i>	44	<i>Spirogyra</i>		<i>Phacus</i>	
<i>Tabularia</i>		<i>Staurastrum</i>	44	<i>Trachelomonas</i>	
<i>Tabellaria</i>		<i>Sphaerocystis</i>			
Chyrsophyta (Golden Algae)		<i>Tetraedron</i>			
<i>Dinobryon</i>		<i>Ulothrix</i>		Pyrrhophyta (Dinoflagellates)	
<i>Mallomonas</i>		<i>Volvox</i>		<i>Ceratium</i>	16
<i>Synura</i>		<i>Zygnema</i>		<i>Peridinium</i>	
<i>Tribonema</i>		<i>Westella</i>	44		
<i>Uroglenopsis</i>		<i>Coleochaete</i>	44		
		Notes: The following is the percentage: diatoms (43.17%), green algae (1.75%), cryptomonas (0.85%), blue-green algae (53.81%), and dinoflagellates (0.42%). There was approximately 3 zooplankton per milliliter.			
Total Genera:	18				
Organisms Per Millimeter:	19848
